SUMMARY

Laravel Full-Stack Developer with **4+ years of professional experience** building **SaaS, fintech, and enterprise-grade applications**. Strong expertise in Laravel architecture, REST APIs, real-time systems, payment & virtual card integrations, and Meta (WhatsApp/Messenger/Instagram) APIs. Proven ability to design scalable, secure, and high-performance systems used in production.

CORE TECHNOLOGIES

Backend: PHP, Laravel, MVC, REST APIs, JSON

Frontend: Blade, HTML5, CSS3, JavaScript, Vue3

Database: MySQL, PostgreSQL (indexing, optimization, migrations)

Real-Time: Laravel Reverb, Echo, WebSockets, Event-Driven Architecture

Integrations: Payment Gateways, Virtual Cards, Meta APIs (WhatsApp, Messenger, Instagram)

Security: Authentication, Authorization, RBAC, API Security

Queues & Jobs: Laravel Queues, Background Workers

DevOps: Linux, Apache/Nginx, Docker (basic), CI/CD concepts

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Engineer | Bug Finder | Sep 2023 – Present

- Designed and maintained **scalable SaaS and fintech applications** using Laravel
- Built secure **RESTful APIs** and role-based access control systems
- Implemented **event-driven real-time systems** using Laravel Reverb & Echo
- Integrated **payment gateways and virtual card systems**
- Worked with **Meta APIs (WhatsApp, Messenger, Instagram)** for omnichannel communication
- Optimized database performance via indexing, query tuning, and caching
- Collaborated closely with product, UI/UX, and QA teams

Web Development Trainer | Knowledge IT Institute | 2022

- Trained students on PHP, Laravel, MVC architecture, REST APIs, and database design
- Mentored junior developers on clean code and best practices

PROJECTS

Omnichannel CRM & E-commerce Platform (SaaS)

System Architect & Core Developer

- Real-time chat system using **Laravel Reverb, Echo, and event broadcasting**
- Unified inbox for **WhatsApp, Messenger, Instagram** via Meta APIs
- **Courier integrations** with fraud detection based on delivery success history
- Advanced **inventory system with batch tracking, expiry management with order lifecycle system** including stock reservation, shipment management, and delivery tracking
- Roadmap: <https://gist.github.com/njbm/df4a07f08924e095ae9e02207a9091b6>

Pay Secure – Digital Wallet Ecosystem

A complete **fintech digital wallet platform** including user, agent, and merchant ecosystems with full API support and mobile applications.

- Multi-wallet architecture with **6 virtual card issuance & 10+ payment gateways**
- Developed **agent and merchant panel extensions**
- Developed **RESTful APIs for Android and iOS applications** (User, Agent, Merchant apps)
- Secure transactions, background jobs, and audit logging
- Full collection link: [Pay Secure – Digital Wallet & Payment Gateway on CodeCanyon](#)

Waiz – Digital Wallet & Remittance Platform

- Developed a **global remittance and wallet system** for cross-border transactions
- Built scalable **RESTful backend APIs** for financial operations

Marketlyst – Multi-Vendor E-commerce Platform

- CodeCanyon-grade product with admin, vendor, and customer panels
- Order management, payments, reporting, and scalable architecture

ZyloChat – Live Chat & Visitor Tracking (SaaS)

- Real-time visitor monitoring and messaging
- Performance-optimized Laravel backend

EDUCATION

B.Sc. in Computer Science & Engineering

Northern University Bangladesh | 2021 – 2024

Diploma in Computer Science & Engineering

Feni Polytechnic Institute | 2016 – 2020
