SUMMARY

Laravel Full-Stack Developer with **4+ years of professional experience** building **SaaS, fintech, and enterprise-grade applications**. Strong expertise in Laravel architecture, REST APIs, real-time systems, payment & virtual card integrations, and Meta (WhatsApp/Messenger/Instagram) APIs. Proven ability to design scalable, secure, and high-performance systems used in production.

CORE TECHNOLOGIES

Backend: PHP, Laravel, MVC, REST APIs, JSON

Frontend: Blade, HTML5, CSS3, JavaScript

Database: MySQL, MariaDB (indexing, optimization, migrations)

Real-Time: Laravel Reverb, Echo, WebSockets, Event-Driven Architecture

Integrations: Payment Gateways, Virtual Cards, Meta APIs (WhatsApp, Messenger, Instagram)

Security: Authentication, Authorization, RBAC, API Security

Queues & Jobs: Laravel Queues, Background Workers

DevOps: Linux, Apache/Nginx, Docker (basic), CI/CD concepts

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Engineer (Laravel) | Bug Finder | Sep 2023 – Present

- Designed and maintained **scalable SaaS and fintech applications** using Laravel
- Built secure **RESTful APIs** and role-based access control systems
- Implemented **event-driven real-time systems** using Laravel Reverb & Echo
- Integrated **payment gateways and virtual card systems**
- Worked with **Meta APIs (WhatsApp, Messenger, Instagram)** for omnichannel communication
- Optimized database performance via indexing, query tuning, and caching
- Collaborated closely with product, UI/UX, and QA teams

Web Development Trainer (Laravel & PHP) | Knowledge IT Institute | 2022

- Trained students on Laravel, MVC architecture, REST APIs, and database design
- Mentored junior developers on clean code and best practices

SELECTED PROJECTS

Omnichannel CRM & E-commerce Platform (SaaS)

- Real-time chat system using **Laravel Reverb, Echo, and event broadcasting**
- Unified inbox for **WhatsApp, Messenger, Instagram** via Meta APIs
- Role-based agent management and conversation tracking

Pay Secure – Digital Wallet & Virtual Card System

- Multi-wallet architecture with **virtual card issuance**
- Integrated **10+ payment gateways**
- Secure transactions, background jobs, and audit logging

Marketlyst – Multi-Vendor E-commerce Platform

- CodeCanyon-grade product with admin, vendor, and customer panels
- Order management, payments, reporting, and scalable architecture

ZyloChat – Live Chat & Visitor Tracking (SaaS)

- Real-time visitor monitoring and messaging
- Performance-optimized Laravel backend

EDUCATION

B.Sc. in Computer Science & Engineering

Northern University Bangladesh | 2021 – 2024

PROFESSIONAL STRENGTHS

- SaaS & enterprise system design
- Fintech & payment integrations
- Real-time and event-driven architecture
- Clean, maintainable, production-ready code
- Strong communication & leadership mindset
